Highly motivated and energetic JavaScript engineer with an eye for process and automation.

EXPERIENCE

Software Engineer, PayPal, San Jose, California   June 2015- Current

- Supported the off-boarding during the separation of PayPal from eBay.
- Supported eBay developers, and triaged high availability Angular/Express Application (eBay Checkout). Supported the transition to a ReactJS environment.
- Enhanced PayPal Developer Platform, built on NodeJS. Providing over 250 internal JavaScript developers and millions of page views with the necessary tooling to go about their day.
- Championed Inner Sourcing and Test Heavy Culture through initiatives that introduced new technologies and options for Developers.

NodeJS, Express, MVC, Agile, Platform, JavaScript, Angular, ReactJS, Mongo

Remote Software Engineering Intern, eBay Inc, San Jose, California September 2014 - June 2015

- Continued to work on intern projects as well as expand the scope of my work to incorporate all companies underneath eBay Inc.

JavaScript, HTML5, CSS, NodeJS, BackboneJS, Dust

Software Developer Intern, eBay Inc, San Jose, California   June 2014 -September 2014

- Worked on introducing SSO, to back-office. Enhanced back-office through a variety of projects.

JavaScript, HTML5, CSS, NodeJS, BackboneJS, Dust

Lead Developer, Live Open House, New York, New York   June 2013 - November 2013

- Built out an internal CMS system. Constructed the backend and built a fluent API that allowed Mobile Devices to access the backend using an authentication layer. Created mobile device mockup interaction [via iOS] to showcase the mobile capabilities of the restful API.

Fluent, SQL, Objective-C, PHP, Laravel, BackboneJS

EDUCATION

Mercer County Community College   January 2013 – September 2015
